# OUR MODULES

01

## DASHBOARD

The **Eccountant LLC Dashboard** is a powerful, real-time control panel designed to give you a 360° view of your business operations.

With an intuitive and customizable interface, it delivers **instant insights** into all critical areas of your organization, including:

Sales & Purchases

Customers & Vendors

Production

Payroll

Cash & Bank Balances

Profit Trends

Business Activities

## SALES & CUSTOMER MANAGEMENT

The **Sales and Customer Management** module in **Eccountant ERP** is a core component designed to drive revenue growth, enhance customer satisfaction, and streamline the complete sales lifecycle—from order to cash.

This module provides full visibility into sales performance and customer accounts, enabling management to track revenue, monitor receivables, and maintain healthy client relationships. It seamlessly integrates with other modules such as Inventory, Finance, Production, and Taxation for a fully unified experience.

Quotation and Proposal Generation	Product and Service Catalog Management	Billing and Recurring Billing	Mobile Sales and Remote Access Support
Sales Order Management	Partial and Full Order Fulfillment	Integration with Inventory, Finance, and CRM	Audit Trail and Compliance Tracking
Customer Master Data Management	Delivery Scheduling and Shipment Tracking	Multi-Currency and Tax Handling (VAT, GST, etc.)	Reporting & Analysis
Pricing, Discounts, and Promotions Management	Sales Return and Credit Memo Handling	Sales Performance Reporting and Dashboards	

## PROCUREMENT & VENDOR MANAGEMENT

The **Procurement & Vendor Management** module in **Eccountant ERP** is designed to streamline your **local and international purchasing operations**, helping organizations reduce costs, improve vendor collaboration, and maintain full control over procurement cycles and import processes. It supports **end-to-end procurement activities**, from requisitions to payment, and offers deep integration with inventory, finance, and supply chain functions for seamless operation.

Purchase Requisition Management	Goods Receipt and Inspection Management (GRN)	Tax Handling (VAT, GST, WHT)	Audit Trail and Compliance Monitoring
Request for Quotation (RFQ) and Vendor Bidding	Three-Way and Four-Way Matching (PO, GRN, Invoice, Quality)	Multi-Currency and Multi-Entity Purchasing Support	
Purchase Order Creation and Approval Workflows	Vendor Performance Evaluation	Integration with Inventory, Accounts Payable, and Production	
Vendor Master Data Management	Purchase Returns and Debit Notes	Procurement for Projects or Cost Centers	
Contract and Blanket Purchase Agreements	Landed Cost Calculation and Allocation	Real-Time Purchase Analytics and Dashboards	

## INVENTORY MANAGEMENT & SUPPLY CHAIN MANAGEMENT

Eccountant offers Inventory Management solutions that will help you effectively manage, monitor, and maximize your stock. For business success, improve transparency and streamline procedures.

Our solutions involve the following:

Stock Valuation

Item Adjustments and ITN

Warehouse Management (WMS)

Procurement Integration

Order Fulfillment & Allocation

Lot & Serial Number Tracking

Supplier Management

Logistics / Transportation

Returns & RMA Handling

Barcode / RFID Integration

Integration with Finance / Costing

Analytics & Reporting

## ACCOUNTS & FINANCE MANAGEMENT

With Eccountant's Accounts Management, you can take control of your accounts and simplify financial procedures. Enjoy smooth bookkeeping, precise reporting, and stable finances for your company. The following are the components of our solutions,

General Ledger (GL)

Accounts Payable (AP)

Accounts Receivable (AR)

Fixed Assets / Asset Accounting

Multi-Currency Management

Tax Management  
(VAT, GST, WHT)

Budgeting and Forecasting

Financial Reporting and Statements

Compliance and Audit Trail

Cost Accounting / Cost Centers

Period-End Close Management

Role-Based Access and Security

Integration with Other Modules  
(e.g., Inventory, Sales, Projects)

## ASSEMBLING & PRODUCTION

By using Eccountant LLC in production and assembly modules play a vital role in helping manufacturing and product-based businesses streamline operations, reduce waste, and improve profitability. These modules offer end-to-end visibility and control over the entire production lifecycle — from planning and raw material procurement to final product delivery.

By automating processes such as bill of materials (BOM) creation, work order generation, resource scheduling, and cost tracking, businesses can ensure timely production, maintain product quality, and avoid stockouts or overproduction.

**Bill of Materials (BOM)  
Management**

Routing and Work Center  
Setup

**Production Orders /  
Work Orders**

Material Requirements  
Planning (MRP)

**Production Costing and  
Variance Analysis**

Subcontracting and  
Outsourced Production

**Serial and Batch Tracking in  
Production**

Quality Control and  
Inspections

**Waste, Scrap, and Rework  
Handling**

**Production Forecasting and  
Demand Planning**

Integration with Inventory,  
Procurement, and Finance

**Compliance and Traceability**

Capacity Planning and  
Scheduling

## PROJECT MANAGEMENT

The Project Management module in modern ERP systems provides businesses with the tools to plan, execute, monitor, and analyze projects across departments or geographies. Whether it's internal projects, client deliverables, or capital investments, this module ensures tasks, budgets, resources, and timelines are aligned — helping teams deliver efficiently and profitably.

### Project Planning and Scheduling

Task and Milestone Management

Resource Allocation and Capacity Planning

Project Budgeting and Forecasting

### Time and Expense Tracking

Cost Tracking and Variance Analysis

Multi-Level Work Breakdown Structure

### Project Progress and Status Tracking

Document and Collaboration Management

Project Procurement and Material Tracking

## Integration with Financials, HR, and Inventory

[www.eccountant.co](http://www.eccountant.co)

### HR & PAYROLL

The **HR and Payroll module** in leading ERP systems enables businesses to manage their workforce efficiently — from hiring and onboarding to payroll processing and performance evaluation. These systems centralize employee data, automate administrative tasks, and ensure compliance with labor and tax regulations, all while enhancing employee engagement and visibility for HR teams.

Employee Master Data Management	Statutory and Tax Compliance (e.g., EOBI, Income Tax, WHT)	Training and Development Tracking
Recruitment and Applicant Tracking	Salary Structure and Pay Components	Shift and Roster Management
Onboarding and Offboarding Workflows	Loan and Advance Management	Workforce Analytics and HR Dashboards
Organization Structure and Position Management	Bonus, Allowances, and Deductions Handling	Integration with Finance and Projects
Time and Attendance Tracking	Self-Service Portals (Employee & Manager)	Multi-Country and Multi-Currency Payroll Support
Leave and Absence Management	Performance Management and Appraisals	Audit Trail and Data Security Compliance
Payroll Processing and Automation		

# INDUSTRIES WE WORK WITH

## ENGINEERING

Eccountant is committed to enabling the engineering community. With Eccountant's specialized solutions, you can increase efficiency in the textile and apparel sectors. We customize our services, from supply chain management to production planning, to meet the needs of your sector.

# OUR CLIENTS

# INTEGRATION

# TESTIMONIALS

“

I was struggling to manage my team and finances efficiently — until I started using Eccountant. It's simple, user-friendly, and has helped me save valuable time. Whether I'm at the office or on the move, Eccountant gives me full control over my business. It played a big role in taking my operations to the next level.

—— **USMAN SHEHBAZ**  
CEO MY GO CUT & SEW

“

Our project management was transformed by Eccountant's ERP solution. Our procedures were made more efficient by the centralized cash handling, integrated inventory, and comprehensive approval system. The tools for project-based planning and reporting have improved our ability to make decisions. Eccountant is cutting-edge for solar companies aiming for digital

—— **ZAHID MAHMOOD**  
CO NATURAL BEAUTY PVT LTD

“

We've been in the lubricant business for over 20 years and were facing ongoing challenges with inventory control, sales lead management, and overall operational visibility. We were in search of a reliable ERP solution — and Eccountant delivered exactly what our business needed. Their system is tailored, efficient, and has made a noticeable difference. We're highly satisfied and confidently recommend Eccountant to others.

—— **MUHAMMAD MANSHA**  
CEO LUB HOUSE

“

"I've been in the environment and services industry for a long time, and constant travel made it difficult to monitor my business effectively. It was affecting our performance and growth. Since implementing Eccountant, I have complete control over my operations — no matter where I am. Access to real-time reports and data has empowered me to make timely decisions and push my business toward consistent growth."

—— **RAJA ASIF SHARIF**  
CEO FRIENDS ENVIRONMENT SERVICES & PEST CONTROL

“

Our production and inventory management were difficult until Eccountant came into play. The process-wise production, direct material demand, and integrated BOM have brought cohesiveness. Our manufacturing processes have been optimized by the system's comprehensive production reports and cost control measures. Eccountant is a key partner in our success.

—— **ABDUL REHMAN**  
SOMFIX

“

Eccountant has completely changed the way we handle our finances. Our operations are now operating with an unprecedented level of efficiency thanks to the smooth integration of finance, production, and inventory. The cost control and real-time reporting features have made a big difference in our bottom line. An essential partner for our expansion is Eccountant.
